

JUN 29 2009

Application Serial No. 10/570,739  
Reply to Office Action of January 30, 2009

PATENT  
Docket: CU-4717

**Amendments to the Claims**

The listing of claims presented below replaces all prior versions, and listings, of claims in the application.

**Listing of claims:**

1. – 4. (Cancelled)

5. (New) A decorative paper exhibiting brightness comprising a bright ink layer on a paper base material and the bright ink layer contains a bright pigment which is scaly foil of a bright substance,

wherein the bright ink layer is provided as an uppermost layer, and

wherein a urethane resin emulsion containing a urethane resin is used in combination with a water based resin containing an acrylic resin and a casein resin for a resin of an ink of the bright ink layer.

6. (New) A thermosetting resin decorative sheet exhibiting brightness comprising a layer produced by impregnating the decorative paper exhibiting brightness according to claim 5 with a thermosetting resin and curing.

7. (New) A thermosetting resin decorative sheet exhibiting brightness comprising a layer wherein the decorative paper exhibiting brightness according to claim 5 is impregnated with a thermosetting resin and cured.

8. (New) A method of producing a thermosetting resin decorative sheet exhibiting brightness comprising the steps of:

preparing a decorative paper exhibiting brightness comprising a bright ink layer on a paper base material and the bright ink layer contains a bright pigment which is a scaly foil of a bright substance,

impregnating the decorative paper exhibiting brightness with a thermosetting resin, and

curing,

wherein the decorative paper exhibiting brightness comprises the bright ink layer as an uppermost surface, and a urethane resin emulsion containing a urethane resin is used in combination with a water based resin containing an acrylic resin and a casein resin for a resin of an ink of the bright ink layer.
